

KNEE RAIL BARRIER

Our **Knee Rail Barriers** are the ideal solution for marking out parking, walkways and protected areas. They are created with ease using V-topped posts, crossbars and galvanised fixing strips.

Manufactured from 100% waste plastic, the material relieves pressure on landfill. Frostproof and rot-resistant, it repels water making it suitable for outdoor use all year round, without any need for painting or additional treatments, and comes with a 20-year warranty.

- » 100% recycled plastic
- » No more painting, treating or staining
- » Weatherproof and water-resistant
- » Rot resistant
- » Tough and durable
- » Available in different weights/sizes

100m of Heavy Knee Rail saves

11.6 tonnes
of CO₂
